Our Patented System

Our revolutionary 'Single Track Design' allows for unparalleled coverage, ease of deployment and unrelenting protection from both the sun and rain. As demonstrated above, our canopy assembly suspends from the single track, producing a peak which forces rain to run off on either side of the canopy track. ShadeFX systems are engineered to operate without the need for a slope, providing a virtually flat installation. Our innovative solution facilitates even the most eclectic designs and tastes, while setting the new industry standard in outdoor space utility.

Welcome to ShadeFX.
